---

Ruby, Rails, SQL, Javascript, React, React Native, Photoshop, Corel, SASS, HTML

## TECHNICAL PROJECTS

---

**DM Mapper** - [youtube.com/watch?v=yAn3X77H940](https://youtube.com/watch?v=yAn3X77H940)

[github.com/meniality/DmMapper](https://github.com/meniality/DmMapper) | [github.com/meniality/DmMapperBackEnd](https://github.com/meniality/DmMapperBackEnd)

Allows users to build a fantasy world in an organized and easily traversable fashion.

- JSON Web Tokens and Bcrypt to encrypt the users information both server and client side.
- ActiveRecord to create complex table relationships on the backend server.
- React Hooks to reduce unnecessary classes and improve readability.

**BibFox** - [youtube.com/watch?v=ZT6jnVjRpR0](https://youtube.com/watch?v=ZT6jnVjRpR0)

[github.com/meniality/library-share-frontend](https://github.com/meniality/library-share-frontend) | [github.com/meniality/library\\_share\\_backend](https://github.com/meniality/library_share_backend)

Allows users to build and maintain a virtual shelf of books that they currently own and find the locations of library share kiosks.

- Google Maps API and Google-Map-React library to customize the visuals of Google Maps.
- SASS to organize and improve the readability of CSS styling.
- React Router to give the appearance of a multi-page app.
- Followed the MVC architectural pattern and RESTful routing conventions

**Board Game MeetUp** - [youtube.com/watch?v=KafJbb7Uj0c](https://youtube.com/watch?v=KafJbb7Uj0c)

[github.com/meniality/BoardGameMeetupFrontend](https://github.com/meniality/BoardGameMeetupFrontend) | [github.com/meniality/BoardGameMeetupBackend](https://github.com/meniality/BoardGameMeetupBackend)

Brief description of the app's functionality and purpose

- Custom built RESTful API backend to store information
- Built in Vanilla JS to understand JS fundamentals
